

# FCE for Biomedical Imaging & Analysis, Fall 2014 (Instructor: Prahlad G. Menon, PhD)

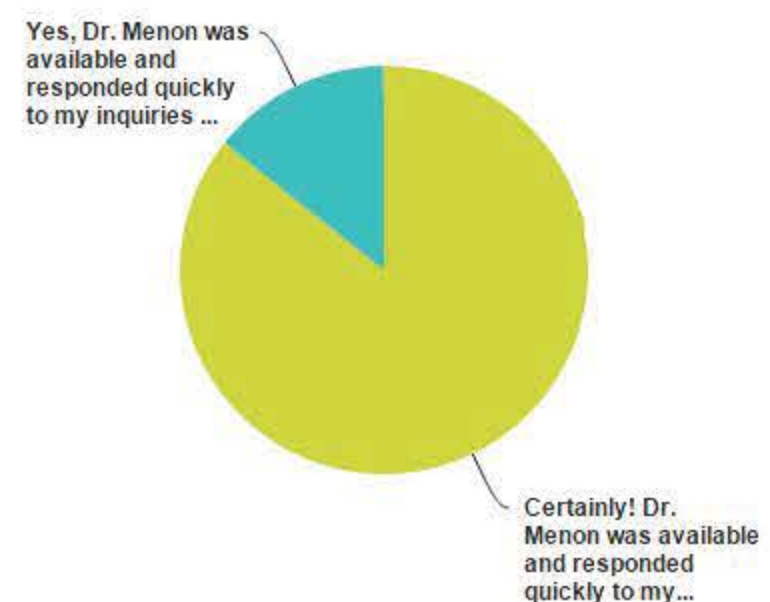

## Course Number: J1-791

### SYSU-CMU Joint Institute of Engineering

How knowledgeable in the course content was your instructor? Was he confident and successful at communicating complex concepts?

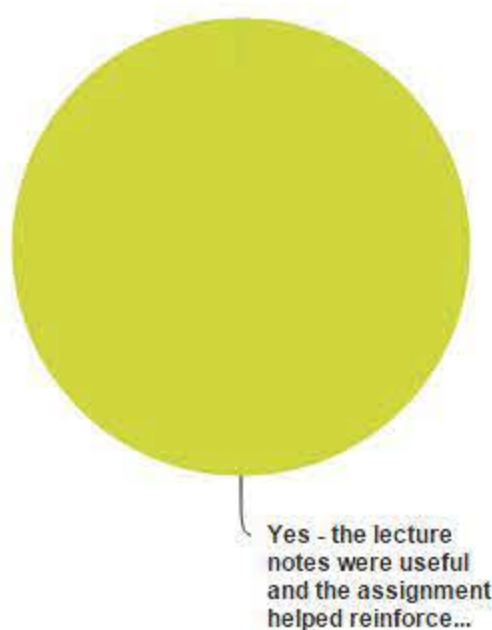

Was your instructor willing, able and responsive to your inquiries outside of the classroom ?

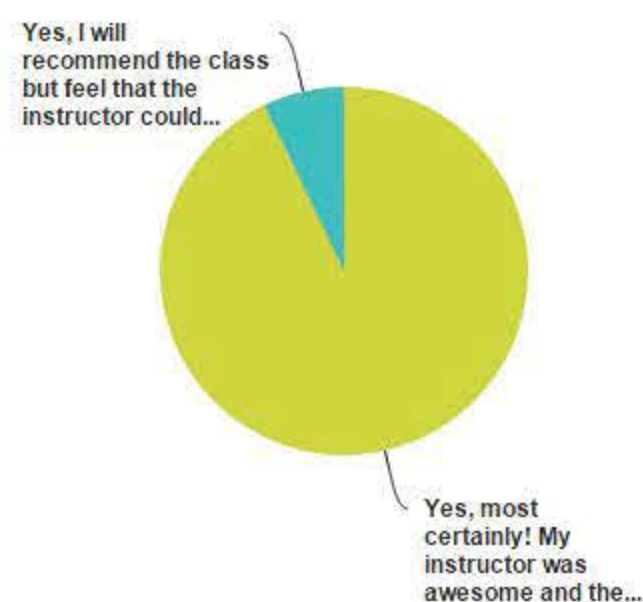

Answer Choices	Responses
Excellent and Excellent - top 5% of instructors I have had	53.85%
Good and Excellent - very clear with concepts and effective communication	46.15%
Average and Good - reasonably effective communication	0.00%
Average and Average	0.00%
Poor and Poor	0.00%

I really like his smile. 12/6/2014 8:30 PM	
I think "Excellent and Good" is a better fit here. It is obvious the Professor is very knowledgeable. Sometimes, concepts were vaguely explained due to time constraints 12/5/2014 9:20 AM	
Even Dr. Menon is so talented, he can teach in a way that every student can catch up, patiently. Though I can not catch up sometimes because my poor mathematic "sense" 12/5/2014 7:15 AM	
Really really brilliant. 12/5/2014 7:05 AM	

Answer Choices	Responses
Certainly! Dr. Menon was available and responded quickly to my inquiries. My questions were satisfactorily addressed and exceeded expectations.	85.71%
Yes, Dr. Menon was available and responded quickly to my inquiries but my questions were not always satisfactorily addressed.	14.29%
No, Dr. Menon was hardly ever available and responded to my inquiries tardily, if at all!	0.00%

Reply every email in 10 mins with structured,helpful,informative content.. I have not seen such a teacher ... 12/5/2014 7:15 AM	
Yes, he is very nice. 12/5/2014 7:05 AM	

Did you feel like you learned from the assignments and lecture notes? Did they reinforce the class tutorials and lectures? Most importantly were they helpful during the project phase of the course..?

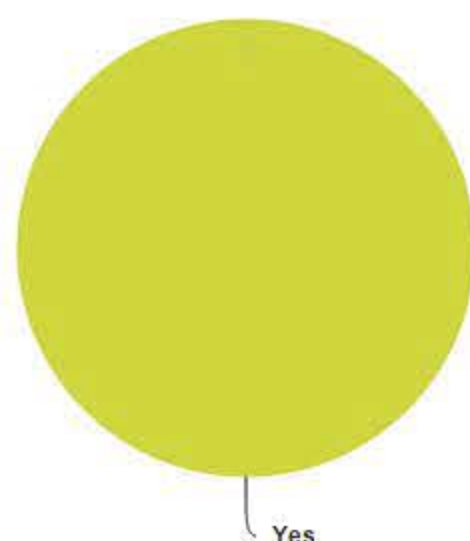

Would you recommend your instructor to a prospective student wishing to learn methods in biomedical imaging & analysis..?

Answer Choices	Responses
Yes - the lecture notes were useful and the assignment helped reinforce my learning experience	100.00%
Yes - the assignments helped reinforce my learning experience but the lecture notes were useless	0.00%
No - I didn't use the lecture notes and the assignments were bogus	0.00%

assignments were really helpful. 12/8/2014 10:48 AM	
Actually, some assignments, I don't understand their meaning and usage 12/8/2014 9:02 AM	
Actually, we would confuse the goal of assignment, it would be better if you give some example output for us. 12/7/2014 1:18 PM	
Assignments help much ! But the one that we have to chop the left ventricle of the heart cost too much time, I think it is good assignment for students to get familiar with paraview, but I think there is a more easy one to make sense... 12/5/2014 7:15 AM	
The assignment are helpful if one can figure it out. 12/5/2014 7:08 AM	
If there is reference book, it may be better. 12/5/2014 7:05 AM	

Answer Choices	Responses
Yes, most certainly! My instructor was awesome and the sheer extent of the content was truly extraordinary.	92.86%
Yes, I will recommend the class but feel that the instructor could improve the course content (please comment in the text box if you feel this way).	7.14%
No, I wouldn't recommend this class to my friends / colleagues or prospective new students wishing to learn about medical image analysis.	0.00%

If I meet someone who want to find a excellent instructor in (bio) imaging & analysis, I will recommend Dr. Menon to him/her before I say hello to him/her... 12/5/2014 7:15 AM	
Of course! 12/5/2014 7:05 AM	

Finally, would you recommend that the Biomedical Imaging & Analysis course from Fall 2014 is converted into a Massive Open Online Course (MOOC) so that a worldwide audience can benefit from it..? Please also add any relevant comments regarding course material, the instructor or your personal thoughts on the class...

Very good class. I really liked it. It would be nice to have less topics and increase the depthness of each topic (more explanations, maybe some in-class simple problems).  
12/5/2014 9:20 AM

Dr. Menon did everything by himself in this semester and very very efficiently (e.g. reply every email detailedly in 10 mins!). However, if it turns to MOOC, I think it is good to have a TA in the class.
